PHILOSOPHY

Health as laid down by the World Health Organization (WHO) i.e

- 1) "Health is a state of complete Physical, mental and social well being and not merely the absence of disease or infirmity".
- 2) Since nurse provided and will undoubtedly continue to provide a large part of health care, their training should equip them with professional expertise to meet the changing demands of society and their expanding role therein. To achieve this, emphasis must be laid to impart the knowledge and skills most relevant to the health care needs of the community and the country as a Whole. This must also be accompanied by a corresponding change in professional attitudes.
- 3) The International Council of Nurses states that the unique function of the nurse is to assist the individual, sick or well, in the performance of those activities, contributing to health or its recovery or to peaceful death that he would perform un-aided if he had the necessary strength, will or knowledge, and to do this in such a way as to help him gain independence as rapidly as possible.
- 4) The trust recognized the Basic B. Sc Nursing education is focused to produce professional nurse leaders among health care professionals in promoting health, preventing diseases, and healing illness among persons and population and enable nurses to enact as stewards for health care within local, national and global communities.
- 5) Scope of nursing practice decomposes provision of primitive, curative & rehabilitative aspects of care to people across their life span in wide variety of health care setting.
- 6) The Trust recognizes that nursing is profession which is influenced by advances in sciences and technology. It believes that skills in all aspects of communication are also essential for learning and for practice of Nursing.
- 7) The Trust also recognizes that the nature of Nursing is such that a substantial portion of learning of student is acquired in the clinical field of practice. It further recognizes the inter dependence of nursing and allied professions and occupations in promoting, maintaining and restoring health and prevention of diseases.
- 8) The Trust believes that it has responsibility in helping the student to develop pride in their professions besides keeping them abreast with current knowledge and professional trends for a successful career ahead.
